me@jonmash.ca   
jonmash.ca   
jonmash 

## skills

**core:** problem solving, project management, product development, effective communication.

**electronics:** system design, embedded systems, prototyping, manufacturing.

**hardware:** specifications, pcb design, assembly & rework, testing & debugging, production.

**software:** specifications, design, programming, testing, deployment.

## experience

## programming

★Node.JS, Python  
Javascript, HTML5,  
CSS3, C/C++, C#,  
★Git/GitHub

## design tools

★Altium, Matlab, PSIM,  
★Notepad++

## interests

electronics, robotics,  
drones, solar power,  
microcontrollers,  
single-board  
computers, linux,  
embedded systems,  
IoT

## education

### Queen's University

2009 – 2013

**M.Sc.** in Electrical Eng.

*Queen's Centre for  
Energy and Power  
Electronics Research*

with Dr. Praveen Jain

Course Avg: 92%

2004 – 2009

**B.Sc.** in Electrical Eng.

*2<sup>nd</sup>/45 in Elec. Eng.  
5<sup>th</sup>/576 in Eng.*

Final Year Avg: 93%

2010 **SPARQ Systems**

Kingston, Ontario, Canada

▼ *Product Developer*

- present • Designed, prototyped, and manufactured an in-home *embedded device* for solar panel and inverter monitoring.
- Developed a novel protocol over Power Line Communication using Forward Error Correcting codes for robust communication with the microinverters.
  - Developed the manufacturing, assembly, and testing procedures to ensure only high quality products are delivered to our customers.
  - Trusted by senior management to provide independent engineering support to customers due to in-depth knowledge of the entire product line.

*Lead Product Developer*

- Given complete control over the design and implementation of an all-new monitoring platform developed in conjunction with new microinverter technology.
- Developed an in-home embedded *Linux* device utilizing advanced *Zigbee* communication, USB, 802.11 *WiFi*, and an advanced *Websocket* API to connect to cloud servers.
- Built an Amazon *Cloud* based monitoring and control solution based on *Node.js*, *CouchDB* NoSQL database, and modern *HTML5* web front end.
- Actively involved in high-level market research, feature requirements derivation, and product requirements specifications.
- Specified hardware components, designed PCBs, aided in mechanical design, produced & tested prototypes, and oversaw the designs through to manufacturing.
- Led and supported the deployment of field trials at sites across North America.
- Grew the group from just myself to a team of over six highly talented developers and engineers (both hardware and software).
- Managed external contractors helping the development of some key aspects of the product.

2009 **Centre for Energy and Power Electronics Research**

Kingston, Ontario, Canada

▼ *Engineering Research Assistant*

- 2013 • Researched and designed a medium-power front-end converter for telecommunications equipment using simulation tools.
- Developed a wind turbine emulator using an induction motor connected to a permanent magnet synchronous generator for use in research activities.
  - Derived novel non-linear control schemes for a PMSG connected wind turbine.

2008 **Ontario Power Generation**

Pickering, Ontario, Canada

*Student - Computers and Controls Division*

- Developed and deployed an online portal to aid in knowledge retention at OPG.
- Identified project requirements, researched possible solutions, and implemented the chosen solution.

2004 **Queen's University Solar Vehicle Team**

Kingston, Ontario, Canada

▼ *Project Manager*

2008 Competitions: *Panasonic World Solar Challenge & North American Solar Challenge*

- Oversaw all aspects of a semi-professional racing team.
- Supervised the design, fabrication and testing of the vehicle.
- Directed efforts in: marketing, sponsorship, event planning, and PR.
- Managed financial planning, purchasing, cash flow, and budgeting.
- Led fund-raising efforts, raising over \$500,000 worth of cash and donations.
- Knowledge of all vehicle design incl.: electrical, mechanical, and software.
- Team's expert on power systems, lithium-based batteries, and solar cells.
